SCAVENGER CHALLENGE

The clock is ticking- it's a race against time! You and your team navigate through the metropolitan jungle in search of cryptic objects, equipped with only the contents of your Urban Survival Pack- a clue book, bottled water, camera, and GPS device!

GPS Scavenger Challenge is a high tech version of the classic game. GPS nav-points and clues are given for each object, and as each object is found, a Polaroid picture will be taken of a team member and the object. The Polaroid's are then added to each team's cluebook. Team members will exercise communication skills and deductive reasoning as they work together to discover the location and identity of each object. The goal is to discover as many objects as possible within the allotted amount of time. The team with the most wins!
